

Project Scope

Tech Stack – React + Node + Firebase

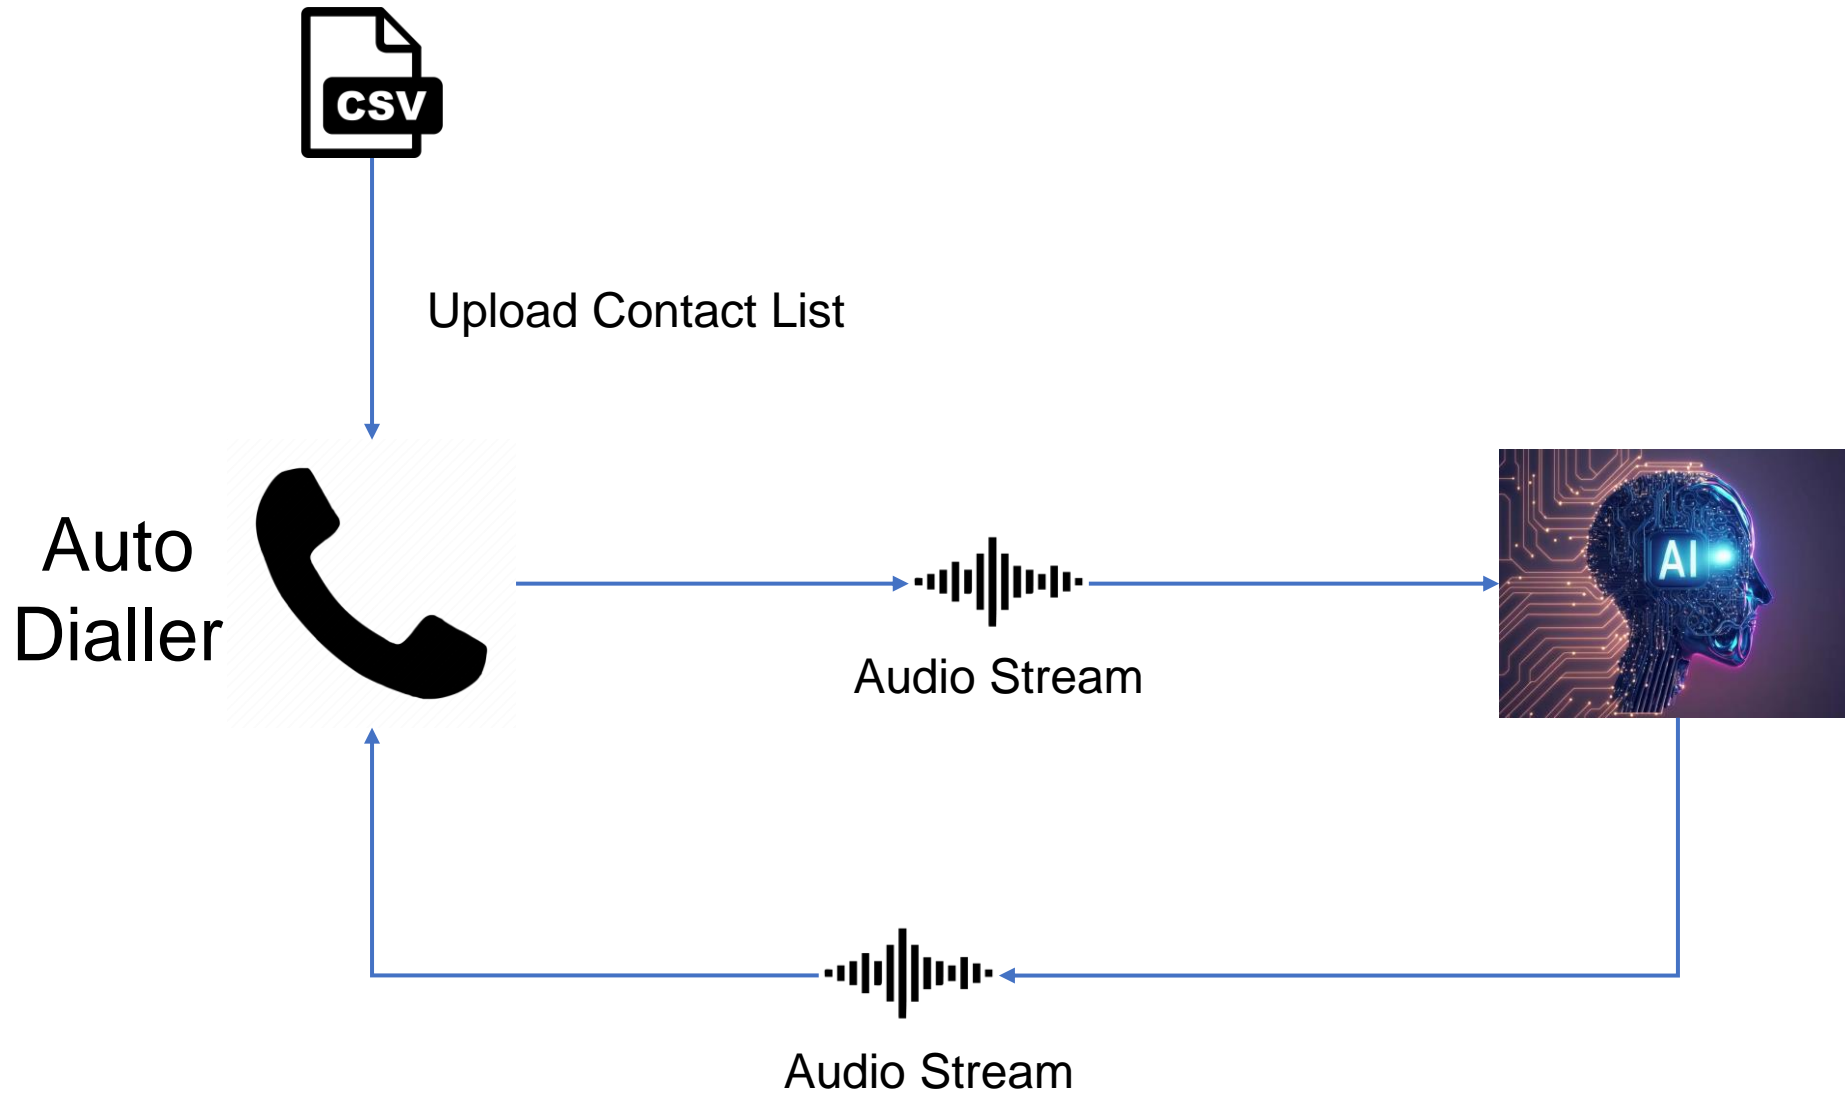

Milestone-1

- Create a Node + React based web app using Vonage to build an auto dialler
- Users to upload a CSV with contact list (Name, Phone No, Email, Address etc)
- Auto dialler will dial the calls- one by one. The response of the caller to be fed (as an audio stream) into an AI (AI being developed by us) through an end point
- AI will respond back with an Audio Stream to be fed to Auto Dialler as a response to the caller through the end point

Milestone-2

- Updating call records and storing in Firebase
- Creating Front End Dashboard
